## NOT MUCH GOOD IN THE GRAIN MARKETS

INFORMATION ON WHEAT GENERALLY BEARISH.

Coarser Grains Were Better Sustained and Improved Somewhat in Price.

the speculative grain situation of country, yesterday's markets being tiresome and uninteresting as ever nessed. Locally, they were nearly in same condition as reported the day fore; that is to say, quiet, slow and weak. developments during the day were by e reason to be content or satisfied with outcome, which favored neither interest

little reason to be content or satisfied with the outcome, which favored neither interest materially, a small loss taking place in the market for wheat and equally as small a gain taking place in the coarser grains. Price changes throughout the day were few, and of the market description, and the situation taken all the way through was one of the most uninteresting, from both a buil and a bear standpoint, that has been witnessed for the past two weeks or more. In the case of wheat there was more weakness than strength shown, and prices sagged down and finally closed at a decline for the day of 150% for the two options. Corn did a little bit better and closed with a gain of 150% for to be and eats, as much through sympathy as anything close, also closed better, being quoted from 150% to be higher than the day before.

Early information, and especially cables and crop news, on wheat was almost wholly bearish, and played right into the hands of those disposed to sell. On the other hand the weather favored the buils to some extent, as rains were reported in harvesting sections of the Southwest. This news, however, was not in it for a minute with Liverpool cables, which, after opening 3d higher, suddenly broke off 3d, or with the Government weekly crop report, with its fine prospects for spring wheat and improvement in winter wheat. This information naturally caused a disposition to sell and right at the start there was considerable for sale, some of it being by commission houses. The opening for Sept. was a first where was one few heat and improvement in winter wheat. This information naturally caused a disposition to sell and right at the start there was considerable for sale, some of it being by commission houses. The opening for Sept. was a willy to 6c in Sept. but the selling continued strenger than the buying, and prices in a short time started downward again. On this decline July went to 63c, and Sept. was more favorable to the selling than to the buying side, and on every soft spot eisewhere, selling would b

HAT—Received 420 tons local and 200 tons through; shipped 345 tons. Offerings continue small of No. 1 grade and above, including timothy, clover and prairie, and those find ready stic at strong prices. Lower qualities quiet, as their supply in excess of the demand. Current rates on trk.: Timothy 14.5-507-5 for choice, 410914 for No. 1, 18912 for No. 2, 19910 for No. 2, 1991-50 for No. 2, 1991-50 for No. 3, Charges-1991, LEAD AND SPELTER—Steady and quiet for lead, which quotable at 14.30 for soft Missouri and 34.52% for chempal hand, Spelter dull at 31.73%.

FOREIGN MARKETS WEAK AND ORDERS SCARCE.

Free Selling by Chicago Holders of Provisions Makes an Easier Market All Around.

REPUBLIC SPECIAL. Chicago, Ill., June 19.-There was little change in prices to-day. Foreign markets were weak and there was an absence of outside orders. About the only noticeable feature was covering of shorts.

ing for local and outside account. Oats were strong. Provisions were easier on selling by locals.

Wheat.

Fine growing weather and weakness of

Wheat.

Fine growing weather and weakness of foreign markets were the bear points to-day, and good selling was noticed at the start. The Southwestern country, where wheat-cutting was in full swing, was visited with heavy showers yesterday, and that created a certain amount of limitity among shorts for a short time. There was a quick recovery on buying of a small amount, which was supposed to be for account of a lending local operator who was short. Spring wheat in Southern Minnesota and Iowa is hending out, and the crop generally speaking, is improving rapidly. Winner wheat harvest is more general in Kentucky this week. Weather in England and France is fine. Outside markets ruled steady. Crop in the pit seemed to have Sept, wheat for saic, Liverpool cables came and to yall lower but, while Antwerp was unchanged. Spot wheat at Liverpool was unsettled. Receipts at Duluth and Minneapolis were 221 cars, against El cars last year. The local receipts included 15 cars of winter wheat and 35 cars of spring and some mixed, a total of 9 cars being received, against 101.

cars, against Ed cars last year. The local receipts included 15 cars of winter wheat and 24 cars of spring and some mixed, a total of 49 cars being received, against 10 cars hast year. Included in this were 3 cars contract grade. Business at the scaboard was fairly large, but there was little said regarding foreign demand. The receipts at Western primary points were 40,955 bu, against 55,617 last year. Shipments from there aggregated 22,125 bu, against 55,617 last year. Shipments from there aggregated 22,125 bu, against 55,617 last year. Shipments from there aggregated 22,125 bu, against 42,25 last year. Exports of wheat and flour were 60,55 bu. The estimated receipts for tomorrow are 60 cars.

There was a good deal of strength shown in cern to-day, which was the feature of the market, the country, coming in on a more fiberal scale than for some weeks past, and favored the buying side, Elevator people claim that the offerings of cash cora are small in the interfor, while the demand here shows more or less improvement. There was considerable business done in the way of selling July and buying September by local professionals, and thus changing had a tendency to make a more lively market than was expected early. While reports showed that corn is improving in many sections, lowa advices say the promise in that State is smaller than usual in the modile of June, Car lots were in moierate demand to go to store and offerings were small. The feeling was firm and prices about let to ha higher. Corn by sample was in fairty good demand and not much in the market. Liverpool cables came lately higher for futures and light higher for spot corn. Local receipts showed 165 cars, of which 2 cars were contract. The estimated receipts in to-morrow are 15 cars. Receipts at Western primary points were only 20,600 bu, as compared with 181,000 bu, last year. Cash sales here were 15,000 bu, and 25 boatloads were taken at the seaboard. Vessel room was chartered for 20,000 bu.

Prices were up %c over yesterday's close and finished at a g
